1. Download the ProtegeMobile app from the Apple App Store or the Google Play Store.

 Click "Already have an account?" at the bottom of the screen then "Create New Account". This is just for logging into the app and is not your web client login information. During this process you will also be prompted to create a PIN which can be used to unlock the app.

3. After logging in press the menu button, my places, then press + to add a new place.

4. Enter a name for your site, this name is only displayed inside the app.

Add Place	
n Name My Site	
Give your place a name.	
External Address	
 Internal Address 	
Username	
$\wedge \vee$	Done
qwertyu i	o p
asdfghj	k I
☆ z x c v b n	m 🗵
123 😄 🖳 space	Go

5. Copy this link to the clipboard on your mobile device.

https://hostedgx.floydtotalsecurity.com:8060/ProtegeGXWebClient/login.php

6. Paste the link into the "External Address" field. Leave the "Internal Address" field blank.

K Add Place	
♠ Name	
Paste Paste	
LAtemai Address	
Enter the URL you would normally use to access your system from outside of your building's WiFi coverage. For example this may be like: www.mybusiness.com:50500.	
▲ Internal Address	
<	Done
qwertyu	i o p
asdfghj	k I
☆ z x c v b n	m 🗵
123 😀 👰 space	Go

7. Enter the username and password you use to login to the web client on your desktop and press save.

Note: We recommend leaving the push notifications turned off.
